PRESENTING THE THIRD
BERKELEY COUNTY RESOURCE HUB!

The Berkeley County Chamber of Commerce, in collaboration with community partners, service agencies, and non-profits will come together to present Berkeley County's newest resource hub! A multitude of service agencies and non-profits will be present to discuss the services they'll provide to the HUBS.

The opening of a third resource hub aims to increase access and knowledge of services available to residents and increase the availability of services to rural communities.

This project was made possible through funding from Google's Data Center Impact Program and support from numerous community partners.

U.S. Department of Veterans Affairs
